INSTRUCTIONAL GOAL:

This class is for School Administrators, SROs, and Law Enforcement. Schools will learn how to prepare a case when a student discloses Cyber-Bullying and/or Sexting. Law Enforcement will learn the simple 3 step process in investigating internet crime. All participants will learn how to empower students, understand the serious nature of these offenses, and why dismissing these reports can revictimize and endanger those who report them. Understand what the appropriate consequences should be and learn to institute such consequences supporting positive juvenile reform in a Restorative Justice/Diversion Program.

Upon completion of the training exercises, participants will:

- Understand why teens and how teens manufacture their own child pornography and distribute it to other teens.
- We will examine our current laws and how they affect our children who commit these crimes.
- The laws we will examine are Possession, Manufacture and Distribution of Child Pornography, Harmful Material Obscenity, and the Illinois Juvenile Court Act of 2000.
- We will learn how to Investigate, Process Juveniles in a diversionary program and make sure these images will not be distributed online by using the NCMEC Child Victim Identification Program (CVIP).
- We will examine software (MMWD) and how Law Enforcement can educate parents on how to use this software to monitor their children.
- We will examine proposed legislation and the intent of that legislation in protecting our children.
